

TD7 ANGLAIS QUIZZ

Endangered species / environment and ecology / Biology / FuseSchool

Julie Budin

True or False ?

- 1) There are only polar bears that are endangered.
- 2) The black rhino is a species in danger of extinction.
- 3) 16 500 animals and plants are not in danger.
- 4) A species classed as vulnerable is threatened with extinction.
- 5) Deforestation has no impact on the extinction of species.
- 6) Natural selection is done by illegal hunters.
- 7) The extinction rate now is not so different than the natural rate.
- 8) Dinosaurs are in extinction because of humans.
- 9) Conservation is preserving biodiversity.
- 10) The decrease of population species is not a big deal.
- 11) The key for a population in good health is genetic variations.
- 12) A lot of genetic variations in a species favors extinction.
- 13) Inbreeding happens more in a big population.
- 14) Climate change and over-fishing are some causes of extinction.
- 15) It's a good idea to add invasive species in a habitat.
- 16) Wildlife parks can't be a solution for endangered species.
- 17) Educating people about the environment and ecology can help the conservation of species.
- 18) In captivity, animals have a normal life.

19) Trees can't be cut down in national parks, and rangers are protecting this place.

20) 80% of plant species are extinct.

21) We should let plant species become extinct.
